

L02 response – Cellular component

main axon		neurofibrillary tangle		CRD-mediated mRNA stability complex		parallel fiber to Purkinje cell synapse	
paranode region of axon		endosome to plasma membrane transport vesicle		mCRD-mediated mRNA stability complex		presynaptic endocytic zone	excitatory synapse
Golgi cis cisterna	clathrin coat on coated pit	main axon inclusion body				parallel fiber to Purkinje cell synapse	
microbody membrane	microbody	clathrin coat			P-body	asymmetric synapse	neuron to neuron synapse
	peroxisome	cell surface	nuclear replication fork	site of polarized growth			
peroxisomal membrane			replication fork			postsynapse	Schaffer collateral – CA1 synapse
	proteasome storage granule		Golgi cisterna				
extrinsic component of presynaptic endocytic zone membrane		extrinsic component of presynaptic membrane				symbiont-containing vacuole	
extrinsic component of presynaptic endocytic zone membrane				host cell cytoplasm part	host cell cytoplasm	host intracellular part	
extrinsic component of synaptic membrane			synaptic membrane	host cell cytoplasm part	host cell part	host cellular component	
		clathrin-coated pit	flotillin complex	spermatoproteasome complex
